Software Engineer & Technology Enthusiast

I am a passionate technology professional with a strong foundation in software engineering and cloud computing. My background includes hands-on experience in full-stack and mobile development, and I continuously seek innovative solutions to solve complex problems.

EDUCATION

Fictitious University

Bachelor of Science in Computer Engineering

2019 – Present

Cityville, Countryland

Imaginary College

Associate Degree in Information Technology

2017 – 2019

Townsville, Countryland

EXPERIENCE

Company A | Internship

Full Stack Developer

Jun 2024 - Aug 2024

Cityville

- Developed a responsive web application to streamline workflow processes and reduce manual data entry.
- Utilized **React** for the frontend and **Express** for the backend to enhance performance.

Company B | Internship

Mobile Developer

Mar 2023 - May 2023

Cityville

- Led the development of a mobile application using **React Native** to improve user engagement.
- Designed and implemented a scalable API with **Laravel** for robust backend communication.

Company C | Internship

Web Developer

Jun 2022 - Aug 2022

Cityville

- Created an e-commerce platform that enhanced the online shopping experience.
- Implemented a responsive design with **Tailwind CSS** to ensure optimal performance across devices.

PROJECTS

Virtual Assistant Application

github.com/johndoe/virtual-assistant

- Developed a chatbot-based virtual assistant using **JavaFX**, enabling interactive communication and document management.
- Integrated advanced NLP features with **pgVector** and **Langchain4j** for dynamic response generation.

Web Portal

github.com/johndoe/web-portal

- Designed and deployed a comprehensive web portal to streamline business operations.
- Employed **React** for frontend development, **Express** for backend services, and **Prisma** for database integration.

HealthCare Mobile App

github.com/johndoe/healthcare-app

- Engineered a mobile healthcare platform using **React Native** for appointment scheduling and patient management.
- Enhanced system reliability with backend services built on **Laravel** and **MySQL**.

SKILLS

- Web Development:** React, Laravel, Express, Node.js, Tailwind CSS, Prisma
- Languages & Tools:** Java, C/C++, Python, JavaScript, Git, Docker, Linux
- Databases:** MySQL, Firebase, PostgreSQL, MongoDB
- Cloud Services:** AWS, Google Cloud Platform

LANGUAGES

Fluent in English, Spanish, and French

CERTIFICATIONS

- Certified Web Developer** Tech Certification Authority
- Cloud Computing Essentials** Cloud Certification Institute

EXTRACURRICULAR ACTIVITIES

Member, Tech Club at Fictitious University, Countryland

2020 - Present

Volunteer, Community Coding Initiative

2019 - 2020
